STYLES ARE BORN

• • • AT **A**NGELICA

HERE, the best creative talents of the trade are at work for YOU! The practical beauty, the high degree of workmanship, and the unequalled excellence of each Angelica garment are the results of long, diligent research.

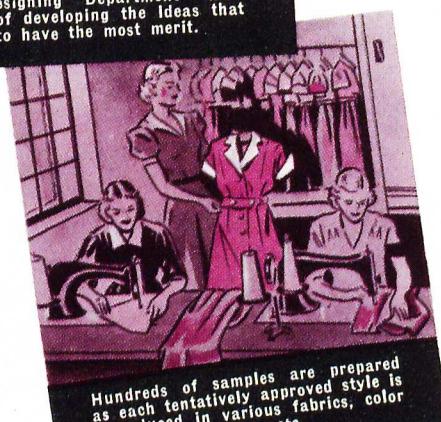

An interesting drama is behind the launching of each number of the Angelica line. Not only do talented stylists actually invade America's fashion centers for new ideas and trends, but also buyers of materials scan markets for the finest fabrics, trimmings, braids and buttons, that will give the utmost in service. Novel ideas and suggestions from the trade are added by the Angelica sales force, nation-wide.

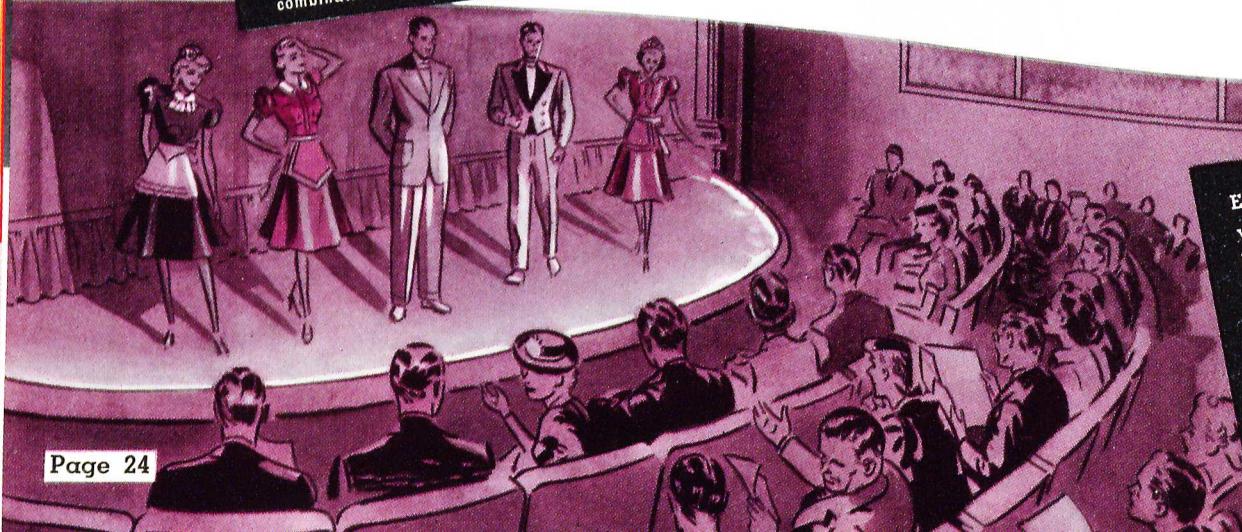

The Designing Department takes charge of developing the ideas that appear to have the most merit.

In thrilling sessions behind closed doors at Angelica headquarters all this information is brought together, thoroughly digested and presented to the organization for final suggestions. Then and there, the styles that will make history are born — styles that make Angelica's line great in the field of service garments.

Hundreds of samples are prepared as each tentatively approved style is reproduced in various fabrics, color combinations, trims, etc.

Everyone vitally connected with Angelica — executives, branch managers, sales force, designers . . . attends the Final Style Convention, where each garment is displayed and voted on until, by a gradual process of elimination, only those considered the finest are adopted for the famous Angelica Line.

THIS SEAL

GUARANTEES THESE IMPORTANT POINTS FOR YOU

Angelicas are tested many times each month by the *American Institute of Laundering . . . and they must test "O. K.", in order to retain the above seal. So far as we know, this seal is the highest award obtainable for washable uniforms.

LAUNDRY INSTITUTE TESTS COVER:—

- 1 QUALITY OF CLOTH**—Many important fabrics that Angelica uses are exclusively constructed to our own specifications based on the requirements of the trade as taught us by our sixty-two years of experience. The Institute has invariably verified our judgment . . . their constant reports indicate Angelica quality is far superior.
- 2 COLOR FASTNESS OF FABRICS**—Angelica uses only fast color fabrics . . . and the American Institute of Laundering must approve all fabrics, threads, trimmings or buttons before we will even consider using them. Once approved, the Institute continues to make its periodical tests to guarantee uniform quality.
- 3 CONSTRUCTION OF FINISHED GARMENTS**—Along with its other tests, the Institute also inspects seam construction, button attachments, reinforcing of strain points, etc., and is high in its praise of our thoroughness and unequaled workmanship.
- 4 CONTROLLED SHRINKAGE**—Angelicas are tailored so that shrinkage is within a satisfactory tolerance . . . they will not shrink below marked size.
- 5 SATISFACTORY LAUNDERABILITY**—Periodically the Institute tests every style for launderability. The garments are tested in the scientific laboratories under actual laundering conditions . . . and the reports show that if laundered properly Angelicas will give extra long, satisfactory service.

* The American Institute of Laundering is owned and operated by the Laundry Owners' National Association, which is composed of twenty-one hundred laundries and is accepted by the textile industry as the last word in laundry research. Their Seal of Approval is only awarded to merchandise that consistently stands up to the rigid requirements of their many tests.

THIS IS MONTE CLOTH

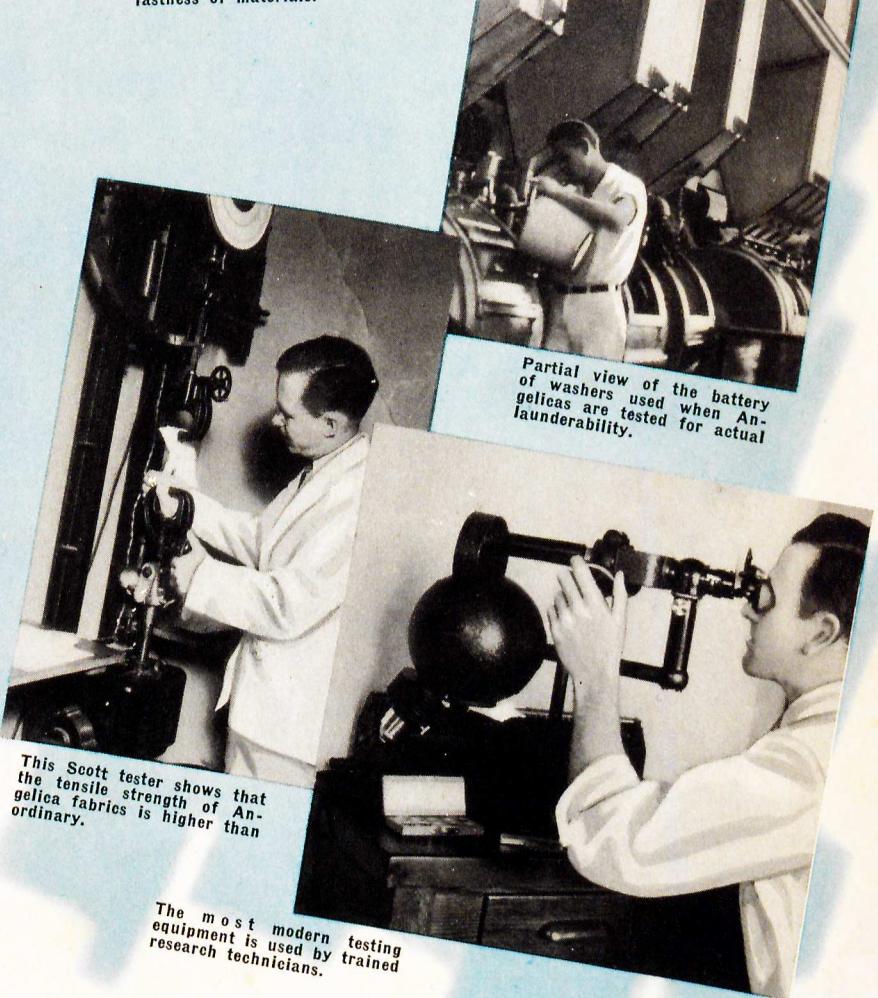

TESTED AND APPROVED BY LAUNDRY INSTITUTE AND USERS

Monte Cloth is an exclusive Angelica material, woven to our specifications with special yarns, constructed to resist wear and tear where strength is needed for service garments, and is tested each month by the Institute to insure the same quality of lasting strength and color. All colors are vat dyed and guaranteed to be absolutely fast color.

Conducting tests in the Research Laboratory as to color fastness of materials.

This Scott tester shows that the tensile strength of Angelica fabrics is higher than ordinary.

The most modern equipment is used by trained research technicians.

Partial view of the battery of washers used when Angelicas are tested for actual launderability.

ANGELICAS ARE UNION MADE

The clean, sanitary, daylight factories in which Angelica merchandise is made, are unionized. Angelica is whole-heartedly in sympathy with and actively cooperating toward the constant advancement of labor conditions.

Angelica employees, carefully trained and highly skilled, work under modern conditions — reflected in honest craftsmanship, and a fine quality of workmanship so noticeable in Angelica products.
